

To See God - It is All About Relationships

When we view God's creation, we see part of God. Our Creator, the Lord God Almighty, will move His creation toward higher order through relationship. This is why He created us. He loves us! He wants to see us grow toward completeness, just as we delight in seeing our own children grow toward completeness, and become fine adults.

A sense of completeness and relationship, we each seek this "reward of living"; it is so much more important than money. So it is with God, and this is why He created you. He seeks out relationship with you; God desires to look at you and say "I am proud of you and I love you so very much".

Some would say that God has no need of us. While it is true that God is perfect and has no needs, I think that since God is love that He desires to love. God did not "need" to create the world and all that's in it, but God "wanted" to create it out of love and said it was good. As an architect, I know about the feelings between a creator and his creation. I know there is a "relationship" with the created object; after all, the created object is actually a part of the creator. God delights in creating; we are all created in His image (Genesis 1:26-27). God is reaching out to you now; salvation can be yours for He has already sent His Son to redeem you; now all you need to do is open the door and let Him into your life by saying: "LORD Jesus I believe that You are indeed God and my Savior, I repent of my sins and wish to live my life for Your glory".

You Must Open Your Eyes - Part 2

It is the design and coloring of most butterflies that impresses me; as an architect, this wonderful God-designed creature is available to you as visual proof of God Himself. A Butterfly is not just some happenstance insect. Look close, notice the wonderfully accurate and beautiful the mathematical designs are of butterfly wings; there is no serendipity here, a Masterful Designer plans and creates these wonderful flying works of art. Note the symmetry. Why would evolution have produced symmetrical wings? Symmetry of design is not needed for flight or survival or mate attraction. The Second Laws of Thermodynamics states that things move toward a state of disorder; so to view a symmetrical butterfly wing set is to view perfection, not disorder. Does a design of this wonderful detail just happen on its own, or is this the wonderful creation "hand-crafted" by some Master Architect?

Don't you see that you can only draw one conclusion; a butterfly is God designed and created. A Great Creator God at work and having unbelievable fun doing it. Yes, God definitely has fun creating; He did it and said it was good (Genesis 1). I invite you to open your eyes up and look closer, much closer, closer than you normally view such things and see a wonderful world unfold. Then, why don't you sing praises to the Author of our creation?

7 THE PERFECT NUMBER
WAYS
TO SEE
GOD

You Must Open Your Eyes - Part 1

Please take a good long look at the detail, the coloring, the rhythms, and the mathematical order of the Mandarin Duck, one of many wonderful exquisite examples of God's creative works of art...creative "poetry"! Each work of creation must reflect a part of its Creator; Part of the creator is found within the creation, within the created item. When you look at the beauty on this planet, be it a person or a "Mandarin Duck", what do you see? Do you see something that has evolved from something else lower than itself? Or, do you see a planned work of art, an individual creation from the Great Creator God?

We Are Wonderfully Designed and Made

Cartilage is the principal working part of the synovial joints. This amazing material was designed by God to last a lifetime, unless attacked externally by disease in our fallen world. It is an almost perfect material. It works well under load, is self-lubricating, is capable of self-renewal, and it is remarkably resilient. This long lasting gliding surface material has a coefficient of friction that is about 20% of ice on ice! With all the technological advancements we've made, we can't duplicate such a material. This material was, and continues to be one of a kind, masterfully designed and created by God out of love.

We could discuss the wonderment of a hundred aspects of the human body. The human body is extremely well planned by the Master Architect, God, and most certainly has not come about by an evolutionary hit-and-miss process from the primordial seas of early creation or some earlier primate species. If you will open your eyes and your heart, you will see God within the wonderful unbelievable systems within the human body.

The Triune God [Elohim] said in first chapter of Genesis, verse 26, "Let us make man in our image, after our likeness." We are masterfully created and did NOT evolve over millions of years. A fool will say there is no God (Ps. 14:1). You were created by a loving God. You are a special person; Christ Jesus died for you!

God is Revealed in God's Vast Universe

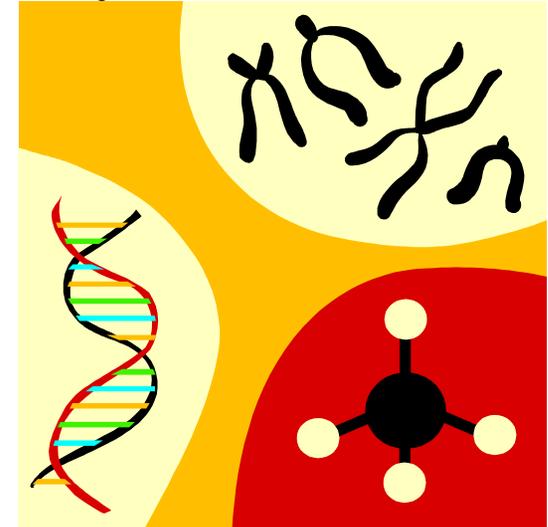

Mankind has always driven to ask the questions of why we exist, what else is going on out there in the heavens, are we the only life in the universe, will we exist after this life? I have heard people say that with the universe so large that mathematically the odds are there just has to be life on some other planet.

There is nothing in the Bible that would even hint to suggest life on some other planet. God has created life only on Earth. Our planet is just in the correct location from the sun so to not burn up or freeze. Our solar system is in just the right location in our Milky Way Galaxy so to have just the right balance of gravity and light. Our Milky Way Galaxy is also in just the right position within our Local Group of galaxies. You must know that all this is NOT happenstance, but is one masterfully great design and created just for those humans on Earth, designed in the likeness of God. Understanding the vastness and the grand design of the universe is very important to the Christian, and points us toward an understanding of how loved we are by our Creator. In this vast universe, God knows you as a single individual and God is calling you to come to Him. Even the hair on your head is known by God (Matt 10:30). God created you and loves you; no matter what you have done to this point. What is going to be your response to that special gift of love? Open your eyes and your heart to the truth found in the Universe. Don't listen to anyone with a complicated argument; to see God, just open your eyes.

God is Revealed in God's Small World

You must become aware that God created all the "elementary particles", building blocks with which all things are made.

A person is not just flesh and bones, but a highly complex collection of very sophisticated systems that can love, think and reason. A flower is not just pedals, leaves, and a stem, but a highly complex collection of very sophisticated systems that can react to environment. Matter is not just a "thing" to be used or wasted, but a highly complex collection of very sophisticated systems made up of a very beautiful structure of mathematics, the 4 universal laws and wonderful organization, all designed and created by God as a gift for us to enjoy and take care of.

The more you know about God's creation, the more wonderful it becomes; it is far more beautiful, far more complex, far more exact, far more mathematical, and far more perfectly designed than we can ever possibly realize. You don't get a sophisticated perfect design as we have by happenstance! With the design set before us, there has to be a God Creator!
